No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Sequence 9, Application US/09799875

Patent No. US20020034780A1

JENERAL INFORMATION:
APPLICANT: Meyers, Rachel
APPLICANT: Williamson, Mark
TITLE OF INVENTION: No. US20020034780A1el Human Pro
TITLE OF INVENTION: NUMBER: US/09/799,875

CURRENT APPLICATION NUMBER: US/09/799,875

CURRENT APPLICATION NUMBER: 60/182,059

PRIOR APPLICATION NUMBER: 09/659,287

PRIOR APPLICAT
                                                                                                                                                                                                                                                                                                                                                                                                                                        RESULT 4

APPLICANT: Aglate, Robert

APPLICANT: Harlocker, Susan L.

TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR THE THERAPY

TITLE OF INVENTION: AND DIAGNOSIS OF OVARIAN CANCER

FILE REFERENCE: 210121.497

CURRENT APPLICATION NUMBER: US/09/867,701

CURRENT APPLICATION NUMBER: US/09/867,701

CURRENT FILING DATE: 2001-05-29

NUMBER OF SEQ ID NOS: 10912

SOFTWARE: Fast-SEQ for Windows Version 4.0

SEQ ID.NO 10282

LENGTH: 426

TYPE: DNA

ORGANISM: Homo sapien
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         RESULT 7

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      US-09-252-991A-24993
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           US-09-384-162-16
Sequence 17117, Application US/09252991A

Patent No. 6551795
GENERAL INFORMATION:
APPLICANT: Marc J. Rubenfield et al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
FILE REFERENCE: 107196.136
CURRENT APPLICATION NUMBER: US/09/252,991A
CURRENT FILING DATE: 1999-02-18
PRIOR APPLICATION NUMBER: US 60/074,788
PRIOR APPLICATION NUMBER: US 60/094,190
PRIOR FILING DATE: 1998-07-27
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        APPLICANT: Xing, Ti

Sequence 23665, Application US/09252991A

Patent No. 6551795

GENERAL INFORMATION:
APPLICANT: Maxc J. Rubenfield et al.
TITLE OP INVENTION: NUCLEIC ACID AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OP INVENTION: AERUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS

FILE REFERENCE: 107196.136

CURRENT FILING DATE: 1999-02-18

CURRENT FILING DATE: 1999-02-18

PRIOR APPLICATION NUMBER: US 60/074,788

PRIOR PILING DATE: 1998-07-27

NUMBER OF SEQ ID NO.33665

LENGTH: 167

TYPE: PRT
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             문

GENERAL INFORMATION:
APPLICANT: Lefebvre, Daniel D.
APPLICANT: Malboobi, Mohammad A.
APPLICANT: Malboobi, Mohammad A.
TITLE OF INVENTION: PHOSPHATE STARVATION-INDUCIBLE PROTEINS
PILE REFERENCE: PPL96-03
CURRENT APPLICATION NUMBER: US/08/688,988B
CURRENT FILING DATE: 1996-07-31
NUMBER OF SEQ ID NOS: 48
SOFTMARE: FASESEQ for Windows Version 3.0
SEQ ID NO 33
LENGTH: 339
TYPE: PRT
ORGANISM: Glycine max

Sequence 32, Application US/08688988B

Patent No. 6096545

GENERAL INFORMATION:
APPLICANT: Lefebvre, Daniel D.
APPLICANT: Malboobi, Mohammad A.
TITLE OF INVENTION: PHOSPHATE STARVATION-INDUCIBLE PROTEINS
FILE REFERENCE: PPL96-03
CURRENT APPLICATION NUMBER: US/08/688,988B
CURRENT FILING DATE: 1996-07-31
NUMBER OF SEQ ID NOS: 48
SOPTWARE: FRASESEQ for Windows Version 3.0
SEQ ID NO 32
LENGTH: 359
TYBE: PRT
ORGANISM: Brassica napus
US-08-688-988-32
                                                                                                                                                                                                                                                                                                                                                                                                                                                                        밁
